Transportation in Rural and Urban Spaces

How is life the same and different in rural and urban areas?

Transportation is about how to get from here to there. What is the route and what is the mode of travel? Walking from one place to another with whatever one could carry was the earliest form of transportation, and the first routes were paths through fields or woods. Where there were rivers, small rafts, canoes and boats provided easier and faster travel than by foot, and they were capable of carrying larger loads than a single person. People by the sea learned how to catch the wind in a boat's sails and travel to distant ports for trade and exploration.

**Early Modes of Transportation**

In early Iowa, rivers were the first highways. Indians, French and British fur traders loaded canoes to trading posts that sent furs to the East Coast and on to Europe. The Missouri and Mississippi Rivers and their tributaries provided an extensive system of water routes. Early Iowa settlers often arrived by sailing down the Ohio to St. Louis or up from New Orleans and then landing in one of the Mississippi River towns. Western Iowa pioneers established Council Bluffs and Sioux City along the Missouri where they could get supplies.

Stage coaches and wagons drawn by horses or oxen could take early settlers across land where there were no navigable rivers. In the 1850s, railroads extended their first lines west of the Mississippi and soon were bringing waves of pioneers seeking homes on the fertile Iowa prairies. Trains could travel in all weather, haul tons of freight on each trip and make travelers much more comfortable. Being on a rail line was so important to a town's survival that local citizens invested in them and voted public bonds to support them. In western Iowa, the railroad companies platted towns along their routes. Soon, nowhere in Iowa was more than 10 miles from a rail line.

**Transportation and Iowa Families**

Farm families used horses to pull wagons and buggies for travel. Livery stables in town kept horses for town families. The coming of the automobile made a huge impact on Iowa, especially farm families. Trains went from town to town on established schedules, but cars could connect farm homes to towns or other local destinations and the riders could travel when they wanted. With autos came the need for more and better roads. The responsibility for road building a maintenance shifted from the neighborhood to the county and state. Who should pay for better roads became a major political issue.

The automobiles greatly helped to end the isolation many farm families felt. While there were still many rural one room schools by 1920, more farm children started enrolling in town high school, and their families no longer made only Saturday night shopping trips into town. Trucks and busses added new forms of travel and hauling. Airplanes made their appearance in the Iowa skies in the early 20th century. The U.S. Post Office added air mail service. Airports in the larger cities connected Iowans with distant destinations, both in the U.S. and abroad. The interstate highway system made automobile travel much faster and safer.

Today, when automobiles are almost universal among Iowa families, there is not that much difference between rural and urban transportation. Urban residents often have more access to public or commercial resources, like taxis or buses, and rural residents usually have longer trips to airline terminals. However, rural trips rarely experience the heavy traffic of urban rush hour. Access to affordable, reliable and convenient transportation is a critical factor in modern life. Iowans have good roads but it is costly to maintain such an extensive system.

Just like technology changes and modes of transportation change, definitions change over time as well. For the purposes of this source set, “long ago” means anything pre-1960, and, with a couple of exceptions, the “today” sources are all in the 21st century. The U.S. Census Bureau revised the population requirement for an urban area since the U.S. population has more than tripled from 1900 to 2000. For the purposes of this source set, the “long ago” definition of urban is a population of 2,500 or more people, which was set in 1910 and remained until 1950. In the “today” category, we use the 2000 definition from the U.S. Census Bureau of 50,000 or more people.

Bird’s-Eye View Map of Marengo, Iowa, 1868

Description
This is a bird's-eye view map of Marengo, Iowa, which was created in 1868 by the Merchant's Lithographing Company of Chicago. The bottom of the map in the middle reads, “Bird's Eye View of the City of Marengo Iowa Co. Iowa 1868.” The references to the left read: 1. Court House, 2. County Jail, 3. Public School, 4. C.R.I. & P.R.R. Depot, 5. Fair Ground. The churches box on the right read: 6. Presbyterian, 7. Christian, 8. Methodist, 9. Catholic. This map is part of a collection of more than 1,700 such maps at the Library of Congress. The panoramic map was a popular cartographic form used to depict U.S. and Canadian cities and towns during the late nineteenth and early twentieth centuries. In 1870, 1,693 people lived in Marengo.

Source-Dependent Questions
• Is Marengo, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• Look at how the land is used in Marengo. What patterns do you see in the number of streets and roads, spacing of the houses, location of businesses, etc., that can help you decide if this is an urban area or a rural area?

Citation Information
Bird’s-Eye View Map of Marshalltown, Iowa, 1868

Description
This bird’s eye view map of Marshalltown, Iowa, was created in 1868 by the Merchant’s Lithographing Company of Chicago. The words in the bottom center of the map read, “Bird’s Eye View of the City of Marshalltown Marshall Co. Iowa 1868. The references box to the left read: 1. Court House, 2. County Jail, 3. School House, 4. C&N.W. Railroad Depot, 5. Public Square. The churches box to the right reads: 6. Baptist, 7. E. Methodist, 8. Pr. Methodist, 9. Lutheran, 10. Presbyterian, 11. Catholic. This map is part of a collection of more than 1,700 such maps at the Library of Congress. The panoramic map was a popular cartographic form used to depict U.S. and Canadian cities and towns during the late 19th and early 20th centuries. The population of Marshalltown, Iowa, in 1870 was 3,218.

Source-Dependent Questions
• Is Marshalltown, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• Look at how the land is used in Marshalltown. What patterns do you see in the number of streets and roads, spacing of the houses, location of businesses, etc., that can help you decide if this is an urban area or a rural area?

Citation Information
Main Street in Elliott, Iowa, 1900

Description
This is the panoramic view of Main Street, showing businesses, wagons, and buggies, in Elliott, Iowa, around 1900. According to the 1900 census, Elliott had 516 residents at that time, and in the 2010 census, there were 350 people living there.

Source-Dependent Questions
- Is Elliott, Iowa, urban or rural? Use evidence from the image to support your answer.
- There are a variety of wagons and buggies in this image. What kinds of goods are being transported in them? Use this information to make an inference about daily life in this area.
- In what ways is this “main street” image similar to and different from: “South Water Street in Chicago,” main street in Columbus Junction, West 7th Street in Des Moines, “Madison Avenue in Chicago, Illinois” and the aerial view of downtown Chicago?
Horse-Drawn School Bus in Webster, Iowa, 1928

Description
This photograph shows children standing beside a horse-drawn bus for the Webster Consolidated School in Keokuk County, Iowa. In 1930, 178 people lived in Webster, Iowa, and in the 2010 census, the population had declined to 88 people living there. Today, students from Webster attend school in Sigourney.

Source-Dependent Questions
- Is Webster, Iowa, urban or rural? Use evidence from the image to support your answer.
- How did kids get into and out of this bus? Is that the same or different than today’s school buses?
- Compare this photo with the bus in Georgia, the buses in Tipton, Iowa, and the bus in Pella, Iowa. How is this image the same, and how is it different?
Wooden Bus of the Renwick Independent School in Iowa, October 1937

Description
The photograph features a wooden bus of the Renwick Independent School in Renwick, Iowa. The photo was taken in October 1937. In 1940, there were 470 people living in Renwick, Iowa, and in 2010, there were 242 people living there.

Source-Dependent Questions
• Is Renwick, Iowa, urban or rural? Use evidence from the image to support your answer.
• Compare and contrast this image with horse-drawn bus in Keokuk County, the bus in Georgia and the bus in Pella, Iowa. How is this image the same, and how is it different?
Logs Hauled on a Sleigh by a Team of Horses in Seward, Alaska, between 1900 and 1930

![Image of logs being hauled on a sleigh by a team of horses near Seward, Alaska, in about 1900.](image)

Description
This photograph shows logs being hauled on a sleigh by a team of horses near Seward, Alaska, in about 1900. The population of Seward, Alaska, was 534 people in 1910 and 2,693 in 2010. In 1900, the major industries in Seward were logging and fishing. Today, tourism is the major industry.

Source-Dependent Questions
• Is Seward, Alaska, urban or rural? Use evidence from the image to support your answer.
• How did this kind of transportation help these workers to do their job?

Citation Information
“Logs being hauled on a sleigh by a team of horses along the government railway, 35 miles from Seward,” between 1900 and 1930. Courtesy of Library of Congress
Farmer Harvesting Corn with a John Deere Tractor, 1945

Description
This farmer is operating a corn harvester with a John Deere tractor. The corn harvester was an attachment that farmers could put on their tractor when it was time to harvest and then take off again.

Source-Dependent Questions
• Is this photo taken in a rural area or an urban area? Use evidence from the image to support your answer.
• How does this kind of transportation help this farmer do his job?
People Loading Potatoes onto a Chicago, Burlington & Quincy Railcar, 1903

Description
Residents are shown standing beside wagons in the process of loading potatoes onto a Chicago, Burlington & Quincy railcar. These men were likely farmers who grew the potatoes and are sending the potatoes to buyers in other places across Iowa or perhaps other states. This image was taken in Lacona, Iowa, in the fall of 1903. The population of Lacona was 496 in 1900 and 361 in 2010.

Source-Dependent Questions
- Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
- Why would the railroad be a good thing for a potato farmer in Lacona, Iowa?
- Compare these service vehicles to other service and delivery vehicles such as the ones for Flynn Farm, Farmers Mutual Co-Op Creamery or Western Union. How does this urban area impact these service vehicle workers?
“Sirloin Special” Hauling Cattle from Hampton, Iowa, to Chicago during Iowa Beef Month, October 1950

Description
This photograph shows a convoy of trucks known as the “Sirloin Special.” They are hauling cattle from Hampton, Iowa, to Chicago during Iowa Beef Month. Chicago was a major meat-packing hub for cattle producers. The population of Hampton, Iowa, was 4,432 in 1950.

Source-Dependent Questions
• Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
• How did the trucks and roads help the cattle farmer?
• How did these trucks help the workers do their job?
Drivers and Delivery Trucks of the Farmers Mutual Co-Op Creamery in Sioux Center, Iowa, May 1940

Description
These drivers and delivery trucks were part of the Farmers Mutual Co-Op Creamery in Sioux Center, Iowa. Creameries collected milk from nearby dairy farms and then processed the milk and cream into butter, yogurt, cheese and milk. These delivery trucks were likely refrigerated. The population of Sioux Center was only 1,680 in 1940 and grew to 7,048 by 2010.

Source-Dependent Questions
• Is Sioux Center, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• How would refrigerated trucks help these workers do their jobs?
“Main Street Life” Essay from The Goldfinch, 1997

Description

In a writing contest in 1976, Iowans remember main street life in the early 1900s when main street was the economic and social center of most Iowa towns. The quotes and descriptions describe how main street looked, sounded and smelled in times long ago.

Transcript of “Main Street Life” Essay from The Goldfinch

Source-Dependent Questions

• What people did do to deal with challenging weather conditions on main street long ago? Use evidence from the text in your answer.

• How might the sights, smells and sounds of main street different today than long ago as described by the Iowans in this article?
Train Carrying Logs, between 1900 and 1920

Description
This image shows a train with multiple logging cars traveling through a wooded area in an unknown location sometime between 1900 and 1920. This image is part of the Detroit Publishing Company collection at the Library of Congress. The Detroit Publishing Company was well known for photographs of city and town views, industry and recreation.

Source-Dependent Questions
- Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
- How did this kind of transportation help these workers to do their jobs?

Citation Information
Train with a Blade Traveling through a Snow Drift, 1905

Description
This photograph shows a locomotive, with a snow blade, covered with snow with mountains in the background. Snow had to be removed from the tracks so that trains could go through.

Source-Dependent Questions
• Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
• How did this kind of transportation help these workers to do their jobs?

Citation Information
Excerpts from *The Goldfinch’s “The Automobile Age,” November 1982*

**Description**
In this edition of *The Goldfinch*, an Iowa history magazine for children, staff writers take a look at the evolution of automobiles in Iowa and the impact it had on the daily lives of people.

**Transcribed Excerpts from “The Automobile Age” from The Goldfinch**

**Source-Dependent Questions**
- How did new forms of transportation make people's lives easier and allow them to make more money?
- How did improved roads make people's lives easier and allow them to make more money?

**Citation Information**
Excerpts from *The Goldfinch’s “Railroads...,”* November 1983

Description

This issue of *The Goldfinch* focuses on the history of railroads in Iowa.

Transcribed Excerpts from *The Goldfinch’s “Railroads...”*

Source-Dependent Questions

- What good decision did the leaders of Cherokee, Iowa, make? Use evidence from the text.
- What impact did the railroad have on the people of Cherokee, Iowa?
Tipton Consolidated School Buses, 1940

Description
This photo is a bird's eye view of Tipton Consolidated school buses. Some school buses are made of wood, and some are made of metal. The population of Tipton was 2,518 in 1940.

Source-Dependent Questions
- Is Tipton, Iowa, urban or rural? Use evidence from the image to support your answer.
- Why are the buses parked in this way instead of in a line like most school buses park today?
- Compare and contrast this image with the horse-drawn bus in Keokuk County, the wooden bus in Renwick and the bus in Pella, Iowa. How is this image the same, and how is it different?
Eclipse Lumber Company Truck in Clinton, Iowa, 1913

Description
This photograph shows a dump truck of the Eclipse Lumber Company in Clinton, Iowa, in 1913. Eclipse Lumber Company also was a distributor of coal and cement. In 1910, 25,557 people lived in Clinton, Iowa. In 2010, 26,885 people lived there.

Source-Dependent Questions
- Is Clinton, Iowa, a rural area or an urban area? Use evidence from the image to support your answer.
- How did this truck help the workers do their job?
- Compare and contrast this construction image to construction in Mercy Hospital, Main Street construction in Shenandoah and the “Excavating for a New York Foundation” video. How is this construction site the same and how is it different?
Fire Truck in Shenandoah, Iowa, October 1950

Courtesy of the State Historical Society of Iowa, Des Moines Register & Tribune, October 1950

Description
This firetruck was relocated across street from the fire station during construction in Shenandoah, Iowa, in 1950. Also shown in image is the Page Theater with marquee and poster promoting the film “Panic in the Streets.” In 1950, 6,938 people lived in Shenandoah, but by 2010, the population dropped to 5,150.

Source-Dependent Questions
- Is Shenandoah a rural area or an urban area? Use evidence from the image to support your answer.
- Look closely at the street that the firetruck is parked on. What is it made out of?
- Compare and contrast this image with the Waterloo fire truck, the fire station in Waterloo and firefighters in New York. What is the same? What is different?
Main Street Construction in Shenandoah, Iowa, October 1950

Description
This photograph shows a bird's eye view of construction that was underway on Main Street for installation of storm sewers and new paving in Shenandoah, Iowa in 1950. This road was paid for by the government using tax dollars. In 1950, 6,938 people lived in Shenandoah, but by 2010, the population dropped to 5,150.

Source-Dependent Questions
• Is Shenandoah a rural area or an urban area? Use evidence from the image to support your answer.
• This construction crew is laying cement on the road. How would a cement road be better than a dirt road?
• How did the buildings, sidewalks and roads help people transport goods from one place to another?
Main Street in Columbus Junction, Iowa, 2003

Description
This map is a bird's eye view of Main Street in Columbus Junction, Iowa, in 2003. This image is part of the John Margolies Roadside America Photograph collection at the Library of Congress. This documentary study featured commercial buildings along main streets and highways throughout the United States over a span of about forty years. Columbus Junction's population in 2000 was 1,900.

Source-Dependent Questions
• Is Columbus Junction, Iowa, a rural area or an urban area? Use evidence from the image to support your answer.
• Compare and contrast this image to main streets in Elliott, Iowa, in Des Moines, on Madison Avenue in Chicago and in downtown Chicago?

Citation Information
Logging Truck in California, June 2013

Description
This truck was loaded with trees on a California highway in 2013. The logging industry in California has existed since the 1849 gold rush. Today, the industry produces 350 million board feet of wood products each year with $100 million.

Source-Dependent Questions
• Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
• How does this kind of transportation help these workers to do their job?

Citation Information
**Iowa’s Rural Public Transit Systems, 2014**

![Map of Iowa's Rural Public Transit Systems](image)

Courtesy of Iowa DOT, “Iowa’s Rural Public Transit System,” Iowa Department of Transportation (Iowa DOT), 2014

**Description**

This 2014 map showing the rural public transit systems in Iowa. Sixteen different regional transit systems exist in different regions of Iowa, along with seven city transit systems.

**Transcript of Iowa’s Public Transit Systems Map**

**Source-Dependent Questions**

- How many regional transit systems exist in Iowa? How many rural city transit systems exist?
- What service is the State of Iowa providing for citizens?

**Citation Information**

“Iowa’s Rural Public Transit System,” Iowa Department of Transportation (Iowa DOT), 2014. Courtesy of Iowa DOT
Grain Elevator in El Campo, Texas, March 11, 2014

![Grain Elevator in El Campo, Texas](image)

**Description**

This is a grain elevator in El Campo, Texas. The population of El Campo was 11,602 in 2010. Grain elevators store grain delivered by trucks and then load them into railcars. Use the [Compare... Cargo Capacity infographic](#) to see how many trucks of grain fit into one railcar.

**Source-Dependent Questions**

- Is El Campo, Texas, a rural area or an urban area? Use evidence from the image to support your answer.
- What kinds of places were be a good idea to build a grain elevator? Where would a grain elevator not be needed?

**Citation Information**

Diesel Locomotive in Lamar, Colorado, May 20, 2015

Description
This photograph shows a diesel locomotive and a line of hopper cars on tracks in Lamar, Colorado. In 2010, 7,804 people lived in Lamar, Colorado. Railcars are used to transport grain from elevators like the one seen in the background to factories or ports to be shipped to other countries. Use the "Compare... Cargo Capacity" infographic to see how many trucks of grain fit into one railcar..

Source-Dependent Questions
• Is Lamar, Colorado, a rural area or an urban area? Use evidence from the image to support your answer.
• How does this kind of transportation help farmers?

Citation Information
Train Snow Plow in Glenwood Springs, Colorado, August 4, 2015

Courtesy of Library of Congress, Highsmith, Carol M., “A train snow plow, which might as easily be called a train snow PROW, sits idle on a summer day in Glenwood Springs, Colorado. But it gets plenty of action...” 4 August 2015

Description
A train snow plow sits idle on a summer day in Glenwood Springs, Colorado. But it gets plenty of action in Colorado's snowy Rocky Mountains that surround the town. Glenwood Springs had a population of 9,614 in 2010.

Source-Dependent Questions
- Is Glenwood Springs, Colorado, a rural area or an urban area? Use evidence from the image to support your answer.
- What job does this machine do?
- Compare and contrast this image to the fleet of snow plows in Iowa, the train with the snow blade, the snow plow in rural Iowa and the wagons removing snow in New York. How is this snow removal the same and how is it different?

Citation Information
Highsmith, Carol M., “A train snow plow, which might as easily be called a train snow PROW, sits idle on a summer day in Glenwood Springs, Colorado. But it gets plenty of action in Colorado's snowy Rocky Mountains that surround the town,” 4 August 2015. Courtesy of Library of Congress
Intermodal Transportation Infographic, 2016

Description
The infographic from the Association of American Railroads shows the process of intermodal transportation. In the transportation industry, there are many ways to move commodities across the world but railroads are part of the backbone of the industry. Intermodal transportation utilizes special standardized containers to transport cargo on trucks, freight trains and ships. These standardized containers are large rectangular boxes, capable of being secured to special trailers. The containers are durable, constructed of steel and built so that they can be transferred between the different modes of transportation.

Transcript of Intermodal Transportation Infographic

Source-Dependent Questions
- What are the three kinds of transportation that containers travel on?
- Why is intermodal transportation a good idea?

Person Next to a Row of Young Corn Crops, June 28, 2018

![Person Next to a Row of Young Corn Crops, June 28, 2018](image)

Courtesy of Rebecca Helland, 2018

**Description**
Farmers often use ATVs (all-terrain vehicles) like this four-wheeler to check on crops or livestock that are too far from the building site to walk but not far enough to need a truck. ATVs also can get into narrow spaces that a car or truck would be too big to enter.

**Source-Dependent Questions**
- Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
- How does this kind of transportation help this farmer to do his job?

“Compare... Cargo Capacity” Infographic, February 25, 2019

Description
This infographic was produced by the Iowa Department of Transportation in 2016 to show the volume of cargo capacity and the equivalent units of semi-trucks, rail cars and barges. For example, one 15-barge tow can haul the same amount of grain as 1,050 semi-truck trailers or 216 rail cars.

Transcript of “Compare... Cargo Capacity” Infographic

Source-Dependent Questions
• How many semi-truck trailer loads of corn fit into one railcar?
• In order to unload a 15-barge tow, how many semi-trucks would be needed?

Citation Information
“Compare... Cargo Capacity,” Iowa Department of Transportation (Iowa DOT), 25 February 2019. Courtesy of Iowa DOT
Barge Carrying Containers near Bellevue, Iowa, Date Unknown

Description
This photograph shows a barge pushing 15 containers likely filled with grain on the Mississippi River at Bellevue, Iowa, in 2013. Lock and Dam Number 12 is pictured just behind the barge. The mighty Mississippi River connects Minneapolis, Minnesota, with New Orleans, Louisiana, and the Gulf of Mexico. It is a major shipping route for agricultural products. Locks and Dams allow for elevation changes in the river so that large barges like this one can make it all the way up and down the river. Bellevue had a population of 2,191 in 2010.

Source-Dependent Questions
- Is Bellevue, Iowa, a rural area or an urban area? Use evidence from the image to support your answer.
- How does the Mississippi River impact farmers and the crops they sell?

Panoramic Map of Chicago, 1857

Description
A bird’s eye view, this is a panoramic map of Chicago, Illinois. Even though this perspective map is not drawn to scale, it shows the buildings, streets and general layout of downtown Chicago as of 1857. The population of Chicago was 112,172 in 1860 and was 2,695,598 in 2010.

Source-Dependent Questions
- Is Chicago, Illinois, an urban area or a rural area? Use evidence from the map to support your answer.
- Compare and contrast this map to that of Davenport, Iowa, in 1888. How are the roads and buildings the same, and how are they different?

Citation Information
Panoramic Map of Davenport, Iowa, 1888

Description
This map is a bird’s-eye view map of Davenport, Iowa. While this map primarily shows the major buildings and streets of Davenport, Iowa, it also shows major landforms and how the streets layout had to be adjusted around them. The population of Davenport was 26,872 in 1890 and had grown to 99,685 in 2010.

Source-Dependent Questions
• Is Davenport, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• Compare and contrast this map to the map of Chicago, Illinois, in 1857. How are the roads and buildings the same, and how are they different?
• How do the landforms affect the layout of the streets in Davenport? For example, look for the tallest tree-covered hills and see how the street layout pattern changes.

Citation Information
Elevated Railroad in New York City, 1896

Description
This photograph shows elevated railroads in the Bowery, a neighborhood in the southern part of Manhattan, New York City. On the ground level, street cars, automobiles, horse-drawn wagons and pedestrians are all moving people and goods from one place to another. The population of New York City was 3,437,202 in 1900 and had grown to 8,175,133 in 2010.

Source-Dependent Questions
• Is New York, New York, an urban area or a rural area? Use evidence from the image to support your answer.
• How many different forms of transportation can you find in this image?
• How were passenger train cars used to transport people in New York City? What opportunities does that provide for people in New York City?

Citation Information
South Water Street in Chicago, Illinois, 1899

Description
The street market is crowded with horse-drawn wagons and carriages in Chicago, Illinois. The population of Chicago in 1910 was 2,185,283, and in 2010, the population was 2,695,598.

Source-Dependent Questions
- Is Chicago, Illinois, an urban area or a rural area? Use evidence from the image to support your answer.
- How do horses and wagons impact a street market like this?

Marine Terminals in New York, between 1900 and 1910

![Image of Marine Terminals in New York](image-url)

**Description**

This image is a view down Cortlandt Street in New York with the Hudson River seen in the background. Many companies set up on terminals as a changing station for modes of transportation from truck/rail to ship and from ship to truck/rail. From this location, ships could go all over the world and trucks and trains could go all over the continent of North America. New York had a population of 3,437,202 in 1900 and 8,008,278 in 2010.

**Source-Dependent Questions**

- Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
- Why would a railroad company have a large building at a marine terminal?

“Excavating for a New York Foundation,” 1903

Description
The scene is an excavation pit at an unidentified New York City construction site. A crew of six men can be seen shoveling dirt into a four-wheeled wooden cart. Then a full cart is slowly lifted out of the pit to street level by a steam-powered crane. These carts are similar in design to those shown dumping trash at the end of the film New York City Dumping Wharf. Advertisements and campaign posters can be seen on the exposed wall of the building in the background. The population of New York City was 3,437,202 in 1900 and had grown to 8,175,133 in 2010.

Source-Dependent Questions
• Is New York, New York, an urban area or a rural area? Use evidence from the video to support your answer.
• Compare and contrast this construction image to the Eclipse Lumber Company, Main Street construction in Shenandoah and construction at Mercy Hospital images. How is this construction site the same and how is it different?

Lumber Steamer Being Loaded in Gulfport, Mississippi, 1906

Description
This photograph shows dimensional lumber ready to load onto cargo ship in Gulfport, Mississippi, in 1906. Lumber products were a major export for Mississippi around 1900, especially yellow pine. A few years later when the yellow pine trees had been mostly cut down, bananas from Central America became the major import to the port with companies like Dole and Chiquita. Gulfport's population was 6,386 in 1910, but grew to 67,793 in 2010.

Source-Dependent Questions
- Was this image taken in a rural area or an urban area? Use evidence from the image to support your answer.
- Describe the kinds of transportation that lumber would take from the forests of Mississippi, through the Port of Gulfport, Mississippi, and to the Port of London, England.

Fire Station No. 1 in Waterloo, 1908

Description
Fire Station No. 1 and its response teams are shown in Waterloo, Iowa, in 1908. In 1910, 26,693 people lived in Waterloo, Iowa, and by 2010, the population had grown to 68,406.

Source-Dependent Questions
- Is Waterloo, Iowa, a rural area or an urban area? Use evidence from the image to support your answer.
- If this fire station is named “Fire Station Number 1,” make a prediction about the number of fire stations in Waterloo, Iowa.
- Compare and contrast this image with the Waterloo fire truck, the firefighters in New York and the fire truck in Shenandoah, Iowa. What is the same? What is different?
**Wagons Removing Snow in New York City, January 1908**

![Wagons Removing Snow in New York City, January 1908](image-url)

**Description**
A line of horse-drawn wagons are shown hauling snow in New York City, 1908. The job of snow removal in a place like New York City is a big task. In the mid-1800s, individual citizens in New York City would clear the streets after a snowfall. There was simply no one else to do it. The only other option was to wait until the snow melted and travel on foot using snowshoes in the meantime. The police department took on that job until 1881 when the Department of Street Clearing was started. The population of New York City was 3,437,202 in 1900 and had grown to 8,175,133 in 2010.

**Source-Dependent Questions**
- Is New York, New York an urban area or a rural area? Use evidence from the image to support your answer.
- Compare and contrast this image to the [fleet of snow plows in Iowa](#), the [train with the snow blade](#), the [snow plow in rural Iowa](#) and the [train snow plow](#). How is this snow removal the same and how is it different?

Automobiles Parked on a Street in Des Moines, Iowa, 1913

![Automobiles Parked on a Street in Des Moines, Iowa, 1913](image)

Courtesy of the State Historical Society of Iowa, 1913

**Description**

Service vehicles (four Model T roadsters and one Peerless truck) of the Des Moines Gas Company are parked on the street near the Thresher Company. At that time, gas powered many streetlights, businesses lights and home lights. The population of Des Moines in 1910 was 86,368, and the population in 2010 was 203,433.

**Source-Dependent Questions**

- Is Des Moines, Iowa an urban area or a rural area? Use evidence from the map to support your answer.
- Compare these service vehicles to other service and delivery vehicles such as the ones for Flynn Farm, Farmers Mutual Co-Op Creamery or people loading potatoes onto a train. How does this urban area impact these service vehicle workers?
Horse-Drawn Wagon Filled with Flynn Farm Dairy Milk Cans in Des Moines, Iowa, 1915

Description
The image shows a delivery wagon of Flynn Farm Dairy on a residential street in Des Moines, Iowa. A driver handles a team of four horses pulling a wagon full of milk cans. Milk was delivered from the farm to the creamery in milk cans like these. At the creamery, some of the milk would be made into yogurt, cheese or butter. Some dairy farmers likely delivered milk directly to residents of Des Moines as well. The population of Des Moines in 1920 was 126,468, and the population in 2010 was 203,433.

Source-Dependent Questions
• Is Des Moines, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• Compare these service vehicles to other service and delivery vehicles such as the ones for automobiles at the Des Moines Gas Company, Farmers Mutual Co-Op Creamery or people loading potatoes on the train. How does this urban area impact these service vehicle workers?
Western Union Messengers in Des Moines, Iowa, August 1918

Description
This photograph shows the Western Union messenger team with bicycles and motorcycles in Des Moines, Iowa, in 1918. Western Union started out as a telegraph communications company with operations across the United States by 1861, and it added money transfers in the late 1800s. The “boy on his bicycle” became a household phrase, and was especially dreaded during World War II when the U.S. War Department sent casualty notifications via Western Union messenger. The population of Des Moines in 1920 was 126,468, and the population in 2010 was 203,433.

Source-Dependent Questions
- Is Des Moines, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
- What mode of transportation did these messengers use? Why was that a good fit in a place like Des Moines but not used in places like Elliott, Iowa?
Ford Commercial Airplane, 1925

Description
In 1925, airplane travel was still very young. Airplanes were not very big and still working on efficient and safe designs. Yet, this was one way to move people and a small amount of goods from one place to another. Location likely near Detroit, Michigan, with a population of 993,678 in 1940 and 713,777 in 2010.

Source-Dependent Questions
- Is Detroit, Michigan, a rural area or an urban area? Use evidence from the image to support your answer.
- Henry Ford is best known for his automobile and assembly line designs. Later in life, however, he took an interest in airplanes and flying. Why might new industries that build transportation like airplanes and automobiles start in urban areas?

Citation Information
Roadway in Des Moines, Iowa, 1928

Description
This photograph has a view of West 7th Street, which shows automobile traffic and commercial buildings (signs such as Sheruman Brothers, International Farm Machinery, etc.) in Des Moines, Iowa, in 1928. Notice the buildings, sidewalk and street in this nearly “main street” image of Des Moines. The population of Des Moines in 1930 was 142,559, and the population in 2010 was 203,433.

Source-Dependent Questions
• Is Des Moines, Iowa, an urban area or a rural area? Use evidence from the map to support your answer.
• In what ways is this “main street” image similar to and different from: Elliot, Iowa, “South Water Street in Chicago,” main street in Columbus Junction, “Madison Avenue in Chicago, Illinois” and the aerial view of downtown Chicago.
Fire Truck in Waterloo, Iowa, May 1938

Description
Fire Chief Ray Tiller with new city fire truck that was one of the first completely enclosed factory-built models of its type in the country. In 1910, 51,743 people lived in Waterloo, Iowa, and by 2010, the population had grown to 68,406. In 2016, the Waterloo Fire Department handled 10,551 calls for service.

Source-Dependent Questions
- Is Waterloo, Iowa a rural area or an urban area? Use evidence from the image to support your answer.
- Compare and contrast this image with the Waterloo fire station, the firefighters in New York and the fire truck in Shenandoah, Iowa. What is the same? What is different?
Workers Repairing a Streetcar in Council Bluffs, Iowa, 1945

Description
Workers are shown repairing streetcar tracks on a downtown street in Council Bluffs, Iowa, in 1945. A rail system connected Council Bluffs with nearby Omaha, Nebraska. Council Bluffs, Iowa had 45,429 people in 1950 and 62,230 people in 2010.

Source-Dependent Questions
- Is Council Bluffs, Iowa, an urban area or a rural area? Use evidence from the image to support your answer.
- What opportunities would a streetcar system provide for residents of Council Bluffs, Iowa?
- What unique challenges would a construction site like this one have?
Construction of Mercy Hospital in Des Moines, Iowa, July 1957

Description
Construction is underway in the photograph on new South wing for Mercy Hospital in Des Moines, Iowa, during July of 1957. Mercy Hospital was started in 1893 by the Sisters of Mercy, a Catholic charity. The population of Des Moines in 1960 was 208,982, and the population in 2010 was 203,433.

Source-Dependent Questions
- Is Des Moines, Iowa, an urban area or a rural area? Use evidence from the image to support your answer.
- Compare and contrast this construction image to the Eclipse Lumber Company, Main Street construction in Shenandoah and “Excavating for a New York Foundation” video. How is this construction site the same and how is it different?

![Image of Aerial View of Downtown Chicago, Illinois, between 1980 and 2006](image)

**Description**

This image was taken from an airplane flying along the downtown skyline of Chicago, Illinois, in 1980. Chicago’s business district is the second largest business district in the United States, second only to Midtown Manhattan in New York City. Navy Pier, a popular tourist destination with large ferris wheel, is seen in the left corner. In 1980, the population of Chicago, Illinois, was 3,005,072 and in 2010, the population was 2,695,598.

**Source-Dependent Questions**

- Is Chicago, Illinois, an urban area or a rural area? Use evidence from the image to support your answer.
- Compare this image to [“Chicago, 1857” map](#) and [“Madison Avenue in Chicago.”](#) How have the streets and buildings of Chicago changed over time?

Dallas Area Rapid Transit (DART) Train in Texas, May 24, 2014

Description
A DART (Dallas Area Rapid Transit) train arrives at the Deep Ellum station in the artistically-rich neighborhood of eastern Dallas, Texas. As one of Dallas’ first commercial districts for African Americans and European immigrants, Deep Ellum is one of the most historically-significant neighborhoods in the city. DART services 700 square miles with more than 65 million passenger trips in 2017. Dallas had a population of 1,197,816 in 2010.

Source-Dependent Questions
- Is Dallas, Texas, an urban area or a rural area? Use evidence from the image to support your answer.
- Notice the lines above the passenger train. That is what powers the train. What form of energy do you think powers that passenger train?

Citation Information
“Iowa’s Urban Public Transit Systems,” 2014

Description
A 2014 map showing the urban public transit systems in Iowa. Two categories are represented: areas of 0-200,000 people and areas of more than 200,000. Interstate-80 connects the three urban transit systems in areas of more than 200,000.

Transcript of “Iowa’s Urban Public Transit Systems”

Source-Dependent Questions
• How many urban public transit systems exist in Iowa? How many transit systems are in areas with more than 200,000 people?
• What service is the State of Iowa providing for citizens?

Massive Container Ship in Savannah, Georgia, May 20, 2017

Description
A massive container cargo ship travels on the Savannah River in Savannah, Georgia. Savannah is the third-largest seaport on the American East Coast. These containers can travel on cargo ships like this one, railcars or truck. The Port of Savannah is the fourth largest container port in the United States. Most of the containers that travel through the Port of Savannah travel to India, the Middle East, the Mediterranean, Panama and Southeast Asia. It takes 22 days for a container to travel from Hong Kong to Savannah. Savannah, Georgia, had a population of 136,286 in 2010.

Source-Dependent Questions
- Is Savannah, Georgia, an urban area or a rural area? Use evidence from the image to support your answer.
- Also look at the “What is Intermodal?” infographic. How does this cargo ship fit into the intermodal transportation system?
