Mr. Robert D. Ray:

I feel Iowa, a place to grow, is just possible referring to the crops, because of the good rich land. Not a place for large numbers of non-English speaking refugees. Our state, like others, is having an economic problem. State employees are not getting raises that should be due to the economy. Yet we are expected to open our arms and wallets to those Cubans and Vietnamese. Please stop it. It could make the state more depressed. Taxpayers' money should not be used for such purposes with our each of us voting on it. Roads need repaired, mentally and physically problems people need
The money first. It’s nice to be a good Christian but religion and politics do not mix
Please stop allowing this. I was told we have a population problem already.
